Strengths

- Intermediate market position, supported by mandatory cessions;
- Moderately strong capitalisation, underpinned by sound internal capital generation;
- Strong liquidity, anchored by conservative asset allocation;
- Intermediate earnings.

Weaknesses

- Limited geographic diversification.

Rating rationale

Namibia National Reinsurance Corporation Limited's ("NamibRe") ratings reflect a strong financial profile and intermediate market position, partially offset by limited premium diversification. This is complemented by mandatory cessions of 12.5% on all life and non-life insurance policies written and renewed in Namibia as per Pillar I of the Namibia National Reinsurance Corporation Act, supporting the reinsurer's business profile.

NamibRe's earnings were maintained within an intermediate level, supported by a favourable claims experience balancing off an increase in net commission expenses. The favourable claims experience was driven by reserve normalisation following a build-up in reserves in anticipation of COVID-19 related risks, while elevation in acquisition costs reflects aggregation of commissions relating to the enforcement of policy cessions dating back to 2018. In this respect, the loss and commission expense ratios registered at 37% and 46% in FY21 (FY20: 65% and 26%) respectively, with the underwriting margin stabilising at 1%. Overall, earnings were supported by investment income amounting to NAD20.5m (FY20: NAD16.1m) translating to a return on revenue of 6% (FY20: 4%). Earnings are expected to be sustained within the current assessment band, with sound investment income supporting thin underwriting margins.

Risk adjusted capitalisation was maintained within a moderately strong range over the past two years, underpinned by a large capital base catering for the well contained exposure to insurance and market risks. As such, the GCR Capital Adequacy Ratio ("GCR CAR") improved to 1.8x at FY21 (FY20: 1.5x). Looking ahead, we expect the GCR CAR for NamibRe to register within the same range over the medium term, given reduced risk to premium growth pressures and well contained dividend distributions.

Liquidity is viewed as strong, underpinned by a conservative investment portfolio. Accordingly, cash and stressed financial assets covered net technical liabilities by around 2.0x over the past two years, while coverage of operational cash requirements was maintained at 3 months. Liquidity strength is expected to be sustained over the medium term.

The reinsurer's business profile is intermediate, largely supported by mandatory cessions as well as increased compliance to policy cessions by industry players. Revenue is fairly spread among products, with three lines of business contributing materially to revenue. Conversely, the reinsurer's premium base evidence limited geographic diversification, with premiums derived from the primary market increasing to 98% in FY21 (FY20: 94%). In this respect, the reinsurer's participation in other markets in the region has reduced in line with management's strategy of selective and prudent underwriting. Going forward, the business profile is expected to remain unchanged.

Outlook statement

The Stable Outlook reflects expected stabilisation in earnings, while risk adjusted capitalisation and liquidity metrics may be maintained within a strong range. The business profile is likely to remain unchanged over the outlook horizon.

Rating triggers

The ratings may be upgraded on sustained improvement in earnings, while maintaining strong risk adjusted capitalisation and liquidity. Conversely, we could lower the ratings if earnings persistently register below expectations, negatively impacting risk adjusted capitalisation and liquidity.

Analytical entity: Namibia National Reinsurance Corporation Limited

NamibRe commenced operations in 2001, following the enactment of the Namibia National Reinsurance Corporation Act (of 1998). The main purpose was to contain the outflow of funds by means of offshore reinsurance placements. In terms of ownership, the business remains 100% owned by the Namibian government, which serves to support the reinsurer's rating through access to mandatory cessions. The analysis was done on a stand-alone basis.

Operating environment

The operating environment assessment reflects the insurer's predominant exposure to Namibia.

Country risk

The Namibian country risk score reflects the sizeable GDP contraction in 2020 (estimated at around 7.3% by the Bank of Namibia) that is expected to weigh on debt to GDP levels in the coming years as the economy tries to claw back lost ground. The pandemic is also likely to see unemployment levels track higher (with an unemployment rate of close to 40%) and a sustained recovery in economic growth will be reliant on an improved outlook for key trading partners such as South Africa. The regional impact of the COVID-19 pandemic further exacerbated existing weaknesses in the economy. Sector risk

The sector risk score applicable to NamibRe mirrors the reinsurer's near total exposure to the Namibian insurance market, reflecting comparatively high levels of insurance penetration and density, coupled with an intermediate regulatory environment. Sector risks are managed by a strong legislative framework and intermediate levels of transparency and policy enforcement, while the planned implementation of risk-based solvency management holds potential for enhanced industry discipline. This is largely due to the presence of strong insurance franchises, translating into well managed earnings risk, albeit with market concentration viewed to be high. Real industry growth is likely to be maintained at an annual average of c. 2%. Business profile

Intermediate market position balancing off very low participation in secondary markets.

Competitive position

| Blended market share (%) | 22.8 | 49.8 | 44.6 |
| Blended relative market share (x) | 6.8 | 14.9 | 13.4 |

NamibRe has maintained its market position, benefitting from compulsory cessions, with compliance to the regulation increasing across the industry. Conversely, the reinsurer registered a contraction in premiums in FY21 given that in the previous year, the growth was mainly due to compliance of insurers with premiums back dated to 2018. As such, gross premiums lowered to USD46.1m in FY21 (FY20: USD50.7m), resulting to a market share of 45% (FY19: 50%). GCR expects the market position to remain unchanged over the rating horizon.

Premium diversification

| Table 2: Line of business diversification (%) | GWP | | NWP | | Retention | |
|---|--------------|--------------|--------------|--------------|-------------|-------------|
| | FY20 | FY21 | FY20 | FY21 | FY20 | FY21 |

| Total | 100.0 | 100.0 | 100.0 | 100.0 | 79.2 | 68.2 |

The business mix is considered to be intermediate, with three lines of business contributing materially to gross premiums. This is however partially offset by limited geographic diversification, with the majority of premiums derived from the primary market (98%) and the remaining business spread across different jurisdictions within the continent. Premium retention rate reduced to 68% in FY20 (FY19: 79%) and is expected to be maintained at a similar level over the rating horizon.

Management and governance

Management and governance factors are viewed to be neutral to the rating.

The board of directors comprises one executive director and seven non-executive members. Supporting committees include the Audit and Risk, Finance and Investment and Human Resources and Remuneration. The chairperson of the Audit Committee is independent. Financial statements were audited by PricewaterhouseCoopers and received an unqualified opinion.

NamibRe's medium term strategy is anchored on achieving sustainable growth through increased geographic diversification, and cancelling loss making accounts, whilst applying cost efficiencies to enhance profitability. The reinsurer has established entrenched relationships in the industry which they expect to facilitate the achievement of the strategy. NamibRe expects to benefit from the reinforcement of the per policy legislation whereby the reinsurer receives 12.5% in GWP for every policy written in the industry, coupled with the compulsory 20% on reinsurance cessions where the reinsurer has first right of refusal.

Earnings capacity

NamibRe's earnings were maintained within an intermediate range, supported by a favourable claims experience balancing off an increase in commission and operating expense ratios. As such, the underwriting margin was maintained at 1% while the net incurred loss ratio and operating expense ratio registered at 37% and 15% respectively in FY21 (FY20: 65% and 9%).

Figure 1: Profit margin performance

Underwriting profitability was supported by investment income amounting to NAD20.5m (FY20: NAD16.1m) translating to a return on revenue of 6% (FY20: 4%). Earnings are expected to register within a similar range going forward.

Capitalisation

Risk adjusted capitalisation strengthened supported by sound internal capital generation.

| Table 4: Capital generation (NAD'm) | FY16 | FY17 | FY18 | FY20 | FY21 |

| Dividend cover (x) | 6.2 | 6.2 | 5.4 | 2.2 | 5.0 |

Risk adjusted capitalisation improved in FY21 supported sound internal capital generation as well contained risk exposures. In this respect, the GCR CAR, improved to 1.8x at FY21 (FY20: 1.5x). Furthermore, the capital base improved in absolute terms to USD18.9m (FY20: USD13.7m). Going forward, capitalisation assessment is expected to be maintained within the same range given that compliance to the per policy regulation has reached 100%. As such, historical fluctuations in underwriting risk are not expected to recur going forward.

Liquidity

Strong liquidity, supported by conservative asset allocation

| Table 5: Liquidity metrics | FY18 | FY19 | FY20 | FY21 |
|------------------------------------|------|------|------|------|
| Liquidity ratio (x) | 4.6 | 2.9 | 2.0 | 2.0 |
| Operational cash coverage (months) | 13.9 | 14.1 | 3.2 | 3.7 |

The insurer's liquidity profile remained sound, supported by conservative asset allocation. As such, cash and stressed assets covered net technical liabilities and operating cash flows by 2.0x and 3.7 months (FY19: 2.0x and 3.2 months). NamibRe's liquidity profile is expected to be sustained within the strong band over the rating outlook.

| Table 6: Investments | FY20 | | FY21 | |

| Total investments | 225.7 | 100.0 | 349.3 | 100.0 |

Asset allocation is skewed toward collective investments that comprise a diversified mix of unit trusts and investment funds through various reputable asset managers. Of these investments, cash equivalents and government securities represent 78% of total invested assets, with the balance split over interest securities, listed shares and unit trusts, implying limited exposure to market risk.

Credit ratings are solicited by, or on behalf of, the issuer of the instrument in respect of which the rating is issued, and GCR is compensated for the provision of these ratings. Information sources used to prepare the ratings are set out in each credit rating report and/or rating notification and include the following: parties involved in the ratings and public information. All information used to prepare the ratings is obtained by GCR from sources reasonably believed by it to be accurate and reliable. Although GCR will at all times use its best efforts and practices to ensure that the information it relies on is accurate at the time, GCR does not provide any warranty in respect of, nor is it otherwise responsible for, the accurateness of such information. GCR adopts all reasonable measures to ensure that the information it uses in assigning a credit rating is of sufficient quality and that such information is obtained from sources that GCR, acting reasonably, considers to be reliable, including, when appropriate, independent third-party sources. However, GCR cannot in every instance independently verify or validate information received in the rating process. Under no circumstances shall GCR have any liability to any person or entity for (a) any loss or damage suffered by such person or entity caused by, resulting from, or relating to, any error made by GCR, whether negligently (including gross negligence) or otherwise, or other circumstance or contingency outside the control of GCR or any of its directors, officers, employees or agents in connection with the procurement, collection, compilation, analysis, interpretation, communication, publication or delivery of any such information, or (b) any direct, indirect, special, consequential, compensatory or incidental damages whatsoever (including without limitation, lost profits) suffered by such person or entity, as a result of the use of or inability to use any such information. The ratings, financial reporting analysis, projections, and other observations, if any, constituting part of the information contained in each credit rating report and/or rating notification are, and must be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities. Each user of the information contained in each credit rating report and/or rating notification must make its own study and evaluation of each security it may consider purchasing, holding or selling. NO WARRANTY, EXPRESS OR IMPLIED, AS TO THE ACCURACY, TIMELINESS, COMPLETENESS, MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OF ANY SUCH RATING OR OTHER OPINION OR INFORMATION IS GIVEN OR MADE BY GCR IN ANY FORM OR MANNER WHATSOEVER.
